6298.0.55.001 - Labour Force Survey Standard Errors, Data Cube, Sept 2008

Previous ISSUE Released at 11:30 AM (CANBERRA TIME) 16/10/2008

Summary

About this Release

This spreadsheet allows the calculation of standard errors for estimates from the monthly Labour Force Survey (LFS). The spreadsheet now has two new worksheets which can be used to calculate the standard errors for the new family estimates produced from the LFS. For information on those estimates refer to the paper Improvements to Family Estimates from the Labour Force Survey, 2008 (cat. no. 6224.0.55.002).

The paper Labour Force Survey Standard Errors, 2005 (cat. no. 6298.0) provides useful information on how to use this spreadsheet. This paper will be revised at a later date.
